Short Description

Life is full of uncertainties, emergencies often occur unexpectedly and natural disasters sometimes strike without any warning signs.

Description

- Life is full of uncertainties, emergencies often occur unexpectedly and natural disasters sometimes strike without any warning signs. The newest design MD-090P weather emergency radio does more than just warn about a coming storm. During a power outage, or some other unexpected scenario, it can work as an ultra-bright LED flashlight to expel darkness, or as a power bank to charge a power off phone, there's also a SOS alert, keeping you safety.

Reading lamp

SOS Alarm

AM/FM/WB Radio

Flash-light

Features

【2020 Upgraded Emergency Radio】 This emergency flashlight radio is more powerful than the best-selling 090 on the market. The main upgrade points are 4000mAh super large battery, visualized percentage of battery surplus, reading lamp upgraded from 4 to 6 LED beads, 3 flashlight lighting modes and 2 reading lamp modes. This is the most powerful 10 in 1, practical and cost-effective emergency weather radio in history. • 【4000mAh Biggest Capacity Battery】 The 4000mAh large capacity battery of emergency radio cellphone charger is twice or even four times that of other weather emergency radio, which is the biggest capacity in the weather radio's market. You will never image the battery capacity of the crank flashlight radio is large than iPhone 11 max. Better solve the problem of crank solar radio battery life and charging mobile phone in case of emergency situation. • 【4 POWER Charging Model】 Hazard weather always lead to power

outages and you would like to have this portable emergency radio. Hand crank and solar power these two power sources can power the weather emergency radio when you need in emergency. USB fast charging is the main power way in daily use. Rechargeable battery can be replaced and you can find it in any stores and supermarket. Power up anytime and anywhere. • **【Super-Bright 3 Mode and Reading Lamp】** If you are an outdoor sports enthusiast or need to walk in a place without lights, Waterproof IPX3 Radio with a three-mode flashlight is a good choice. Its farthest lighting distance is more than 10m, which is more than other most emergency solar radios. In addition, reading lights with motion sensors will greatly help you get up at midnight and avoid waking up your family. • **【A Life Saver Radio】** When natural disasters come, such as hurricanes, snowstorms, etc., how can we prevent them? When the whole city is blackout and falls into darkness, how can we spend this dark night? When we are trapped in natural disasters, how can we save ourselves? You only need an emergency flashlight radio, with 7 NOAA stations and rechargeable & replaceable 4000mAh battery, plus the hand solar phone charger and SOS alarm. Don't be afraid of all kinds of emergencies.
