Short Description

PCIE 3.0 Gen3 x4 Male to Female Extension Cable Riser Card R22SF

Description

Product advantage:

- Wire advantages, the use of the German patent imported wire, using Taiwan's imports Lotes connectors, high frequency support PCIe 3.0 32G/Bps stable transfer.
- Cable length from 5 cm to 1 m can accept custom-made, our sales turn wiring, wire low impedance, wire within 60 cm long support PCIe3.0 at full speed.
- Differential signal without hole design, there is no problem of signal attenuation interference in a parasitic capacitance and parasitic inductance, there will be no more CAF micro short circuit, durability
- Product use high quality materials, PCB precision workmanship, thickening to 1 oz copper thickness, content of gold finger plating, gold plated conductive performance is good, can reduce oxidize higher impedance caused by the crash blue screen.Full speed stability, need not to slow down, there is no compatibility problems.
- Product selection of the wire itself is very durable, used in metal welding point 3 mm in thickness PCB pads to protect, and lock the screws and hex nut fastening, solid and reliable products pulling resistance, anti-interference, there will be no nail wire break off.Wire can be bent can fold, does not affect use.
- PCB design of dwarf and add fat, dwarf is not card to the graphics card, add fat extended design make the board more easy to install, reduce the damage probability.

Features

Features:

- Maximum Speed: PCIe Gen3.0 32Gbps.
- Connector A: gen 3.0 PCIe x4 male
- Connector B: gen3.0 PCIe x4 Female
- Length: 10cm / 30cm
- EMI Shielding with Conducting Polymer
- Applicable card: high-speed network card, capture card, NVMe SSD hard disk card, USB adapter card, as long as it is PCI-E x4 interface can support
- Length description:The Cable length refers to the part of the visible wire, does not contain the PCB and the connector

Brand	ModDIY
SKU	MDY-CO482
Weight	0.2000
Color	Black
Cable Type	PCI-E Extension
