## Short Description

Ramp up your gaming experience by installing the 32GB Crucial Ballistix RGB DDR4 3200 MHz UDIMM Gaming Desktop Memory Kit into your desktop computer. Featuring a low-profile design for small form factor systems, RGB LED lights, and black anodized aluminum heatsinks, this 32GB memory kit includes two 16GB 288-pin DDR4-3200 non-ECC unbuffered DIMMs (UDIMM) to help drive your games and applications.

## Description

---

### Crucial Ballistix RGB

Designed for high-performance overclocking and is ideal for gamers and performance enthusiasts looking to push beyond standard limits. 16 RGB LEDs in 8 zones can be customized and controlled with software.

## Features

---

## Bold RGB Effects

Customize your rig with 16 RGB LEDs in 8 zones on each module and control light patterns and brightness with software utilities. Crucial Ballistix MAX RGB - Removable lightbar allows you to add your own custom 3D-printed lightbar.

## Redefine Game Performance

XMP 2.0 support and pre-defined profiles let you overclock to extract maximum performance. Select the JEDEC default profile for standard performance.

## Compatibility Tested

We work with AMD and Intel, as well as motherboard designers and system builders, to ensure our memory is optimized for high performance.

## Precision Parts

As the manufacturer of memory components, we do more than bin parts. We optimize performance at the die level.
