\$3.99

## Product Images

## Short Description

EK-Quantum Torque Micro Extender Static MM 7 - Nickel is a premium male-threaded extender interconnect with male threads on both ends. It is used for connecting two water cooling components which both have female G1/4 threads.

## Description

---

EK-Quantum Torque Micro Extender Static MM 7 - Nickel is a premium male-threaded extender interconnect with male threads on both ends. It is used for connecting two water cooling components which both have female G1/4 threads. This extender is especially useful in situations where the port spacing is too low, or due to clearance issues.

This is not a revolvable extender.

Made from nickel-plated CNC machined brass. Sealed with quality EPDM O-rings.

These static extenders can be either tightened by hand or by using [EK-Loop Multi Allen Key / Allen Key 9mm](#) (not included, available for separate purchase).

PLEASE NOTE:

- Do not use excessive force when attaching fitting barbs using Allen Key 9mm in order to prevent damage!
- This product should NOT be installed with any aluminum [Fluid Gaming](#) parts!

## Specifications

---

Technical data:

Threading: 2 x G1/4" (Male - Female)

Thread length: 4.5mm

Diameter: 16.5mm

Height: 7mm

Made in Europe

## Additional Information
