Short Description

This reserves and compensating reservoir "Slot-In" has been designed for computer watercoolings. It shows simple mounting, handling and cool optics. It only has to be put into an empty 5 1/4 slot. READY! No boring or sawing is necessary.

Description

Repack-cooling Slot-In rev. 2 reserves and compensating reservoir

This reserves and compensating reservoir "Slot-In" has been designed for computer watercoolings. It shows simple mounting, handling and cool optics. It only has to be put into an empty 5 1/4 slot. READY! No boring or sawing is necessary. Due to the operation of the Slot-In, the enclosed air in the cooling system can automatically be released. The reservoir is to be closed with a plug, thus a closed system arises. No water can evaporate which makes the annoying refilling unnecessary.

Complete CNC drilled reserves and compensating reservoir made of POM (plastics).
UV-resistant O-Ring (Viton), 8 non-rusting screws, 10 mm thick plastics glass now with polished sides prepared for 5mm LEDs, G1/4" threads, approx. 120 ml water reserve, simple filling due to only one screw, easy control of the water reserve and of the pump function, simple mounting and super optics.

Scope of delivery:

- Completely mounted reservoir
- 4 holding screws
- Plug

DBGM/legal protection for registered utility models

Additional Information

Brand	Alphacool
SKU	AC-15609-D
Weight	2.0000
Color	Black
Reservoir Type	Single-Bay Res
