

# EK-Quantum Torque Rotary Offset 3 - Nickel

\$10.49

## Product Images

## Short Description

EK-Quantum Torque Rotary Offset 3 - Nickel is a premium revolvable male+female threaded offset adapter fitting. It is commonly used to distance or offset G1/4" ports in tight spaces or to perfectly align hard tubing to another port in order to have aesthetically pleasant parallel tubing.

## Description

---

EK-Quantum Torque Rotary Offset 3 - Nickel is a premium revolvable male+female threaded offset adapter fitting. It is commonly used to distance or offset G1/4" ports in tight spaces or to perfectly align hard tubing to another port in order to have aesthetically pleasant parallel tubing. Aesthetically, it is a perfect match with the EK-Quantum Torque series fittings and adapters.

Made from CNC machined brass in a satin black finish. Sealed with quality EPDM O-rings. These offsets adapter fittings are rotary and they can be rotated around their axis in 360 degrees to fine-tune and find the exact positioning required.

PLEASE NOTE:

- This product should NOT be installed with any aluminum [Fluid Gaming](#) parts!

## Specifications

---
