

# Aquacomputer backplate for kryographics NEXT RTX 3080 Strix / RTX 3090 Strix, active XCS

\$59.99

## Product Images

## Short Description

---

This back plate is manufactured from massive aluminum and can be mounted in addition to a kryographics NEXT RTX 3080 Strix / RTX 3090 Strix water block

## Description

---

This back plate is manufactured from massive aluminum and can be mounted in addition to a kryographics NEXT RTX 3080 Strix / RTX 3090 Strix water block, giving additional stability especially in the voltage regulator area of the graphics card. Additionally, the RAM modules on the back of the RTX 3090 Strix graphics card are cooled effectively.

The back plate is anodized in black color. For optimum heat dissipation, the back plate is connected to the water cooling system by a heatpipe. The back plate comes with a connection terminal that replaces the terminal originally installed to the kryographics water block.

## Specifications

---

Materials:

- Back plate: Aluminum, anodized
- Heatpipe: Copper, nickel plated
- Fixing plate (heatpipe): Stainless steel
- Connection terminal: Acetal

Scope of delivery:

- One back plate
- One heatpipe
- One connection terminal
- Thermal conductive pads
- mounting material
