Short Description

Designed and manufactured in the USA by Performance PCs.

This is a single loop Distribution plate that fits in the rear of the lian Li PC-011 XL. The ports have been design to make routing to your CPU and GPU clean and easy. There is a include DRGB strip that can be used how you see fit but we have found it best to mount between the distro and the inner side of the case.

Description

Designed and manufactured in the USA by Performance PCs.

This is a single loop Distribution plate that fits in the rear of the Lian Li PC-011 XL. The ports have been designed to make routing to your CPU and GPU clean and easy. There is an included DRGB strip that can be used however you see fit but we have found it best to mount between the distro and the inner side of the case. This distro plate is meant to be used with a Pump/Res or a stand-alone pump as it does not have pump mounting options.

Channelz Effectz Service

Tired of all that colored Coolant clogging up your loop but don't want to stick with some boring old clear coolant? Well Performance-PCs has you taken care of with their new Channelz Effectz Service! This service is a great way to add some color to your Channelz distribution plate without clogging your loop with pastel or mica filled coolants. We use an epoxy resin mixture that is safe for your loop and will certainly help that build POP. There is 30 different super vivid color options to choose from and we even added the ability for you to mix colors to give your loop its own style.

Features

Installation:

Compatible with the Lian Li PC-O11 Dynamic XL. Place the Distro so that the mounting holes line up with the rear fan mounting holes, Use the included M4x12mm Countersunk screws going through the outer rear of the case into the mounting for the distro.
