# EK-Quantum Vector Terminal Cover - Nickel

$31.99

Product Images

Short Description

A premium aesthetic terminal cover for EK-Quantum Scalar terminals, EK-Quantum Scalar accessories like the Flow Indicator, and a replacement cover for stock GPU terminals as well.

Description

A premium aesthetic terminal cover for EK-Quantum Scalar terminals, EK-Quantum Scalar accessories like the Flow Indicator, and a replacement cover for stock GPU terminals as well.

The cover is machined out of a solid piece of aluminum which is then anodized to a silver shade to give it a premium look and feel. The cover can be attached quickly and easily by using the integrated pin screws located on the backside of the terminal cover.

The prime purpose of the product is to provide a terminal cover for users with EK-Quantum Vector RE RTX 3080/3090, EK-Quantum Vector Trinity RTX 3080/3090, EK-Quantum Vector Trinity RTX 3070, EK-Quantum Vector Strix RTX 3080/3090, and similar GPU water blocks which have a single piece terminal, which is then replaced with an EK-Quantum Scalar Flow Indicator. The EK-Quantum Vector Terminal Cover will provide an aesthetically cover for the screws, which blends in with the water block and flow indicator perfectly.

In the same way, the EK-Quantum Vector Terminal Cover can provide an aesthetical shroud for the screws for multi GPU setups using any of the EK-Scalar Dual or EK-Scalar Quad terminals.

Finally, any user who wishes to reduce the number of RGB LED sources in his PC, can use the EK-Quantum Vector Terminal Cover to replace the stock plastic cover on water blocks that have the two-piece terminal design (acetal terminal + plastic cover).
