Singularity Computers Spectrum 2.0 DRGB 50CM LED Strip

$18.00

Product Images
Short Description

One of the most important aspects of lighting your PC is being able to hide the light source. We have created an LED Strip which is extremely low profile, narrow and it is also flexible. With a width of 5mm and a high of just 1.5mm it is perfect for hiding in tight spaces to achieve the best lighting effects.

Description

One of the most important aspects of lighting your PC is being able to hide the light source. We have created an LED Strip which is extremely low profile, narrow and it is also flexible. With a width of 5mm and a high of just 1.5mm it is perfect for hiding in tight spaces to achieve the best lighting effects. It can be cut to your desired length further increasing the possibilities. Spectrum 2.0 has 30 DRGB individually addressable LEDs. It is 300mm long and has a 500mm cable to reach your motherboard even in larger cases. It is compatible with any motherboard or controller which is DRGB.
Experience Singularity:

We create the products we want in our builds based on our 15 years of experience building high end computers. All our designs begin with function, versatility is vital to increase the possibilities so that you can create the build you want to, something unique. Our products are premium, we do not hold back on quality to save cost. All our products use the most high-end available materials and manufacturing processes. Our vision is to continue to introduce unique and exciting ideas, to inspire and lead the industry.
