Short Description

The Alphacool Eiszapfen connection terminal with 4x G1/4" internal threads offers versatile possibilities to expand the water circuit with different components.

Description

The Alphacool Eiszapfen connection terminal with 4x G1/4" internal threads offers versatile possibilities to expand the water circuit with different components.

Material and patented sealing plugs

In order to save as much weight as possible, the connection terminal is made entirely of acetal, resulting in a total weight of only 20g. Two sealing plugs made of acetal included. To keep the design of the cube-shaped adapter even on all sides, Alphacool uses the patented sealing plugs. These close flush to the surface and are already in use with some Alphacool products.

What can I do with it?

With such an adapter, parallel circuits can easily be realised. Or you can use it to integrate a drain tap into the circuit. Of course, temperature sensors can also be mounted on it. It is also possible to split and merge circuits. You can also simply use the adapter as a fancy elbow. The possibilities are extensive.

Specifications

Technical data

L x W x H: 26,5 x 26,5 x 26,5 mm

Weight: 20 g

Material: Acetal

Connection: 4x G1/4" inner thread

Additional Information

Brand	Alphacool
SKU	AC-17557
Weight	0.0700
Special Order	No
Fitting Type	Splitter
Fitting Size	G1/4 to G1/4
Fitting Finish	Matte Black
Vendor SKU/EAN	4250197175579
