Short Description

TN GPU Waterblock RX 6800(XT)/6900XT is a GPU full coverage water block designed for AMD Radeon RX 6000 series graphics cards using AMD's reference PCB design.

Description

The high-performance, full cover GPU water block for AMD's Radeon RX 6800, 6800 XT and 6900 XT reference designs. It comes in a sleek, innovative design with no visible screws on the block itself. Together with our backplate it encases the whole graphics card. The optional backplate has our high quality surface treatment with the black elox matching the line of our best-in-class CPU water blocks.

The water block base is CNC machined from POM-C with a pure copper coldplate. All critical components of the graphics card are cooled with our innovative and improved, low resistance hydraulic flow design. The top cover is made of POM-C (Acetal) with ravishing milled patterns. The fine copper fins over the GPU chip, in combination with our optimized water flow deliver class-leading cooling performance.

Optional

An optional full coverage aesthetic backplate is also available for this Waterblock to improve the passive cooling on the backside of the circuit board.

Features

Included:

- TN GPU Waterblock AMD RX 6000 series
- Thermal Interface Material: Thermal Compound – Arctic MX-2 0,75g & Pre-applied thermal pads
- Sealing plugs G1/4" BSPP for unused threads
- Mounting accessories
- Installation Manual

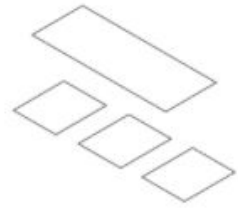

Fittings are not included

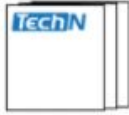

Water block with G1/4" connector

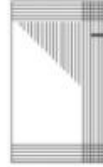

13 Screws M3x4mm
