## Features

---

TOUGHAIR 110 is a 114 mm tall top-flow air cooler that supports up to 140 W. The top-flow design is also beneficial in cooling other components on the motherboard while cooling the CPU.

TOUGHAIR series utilizes high static pressure fans, which leverages the TOUGHFAN 12 design and boosts the fan speed to 2000 RPM, providing a new level of cooling performance to our CPU cooler.

The fin is designed with an asymmetric structure that allows larger air intake through the fins. This design lowers the air turbulence and straightens out the airflow making it easier to disperse heat from the fins, delivering superb cooling performance.

4 x Ø6 mm heat pipes directly touch the CPU and thermal paste, providing direct and outstanding heat dissipation to the CPU.

TOUGHAIR Series is designed to fit Intel and AMD sockets, including the following models:

Intel: LGA 1200/ 1156/ 1155/ 1151/ 1150

AMD: AM4/ FM2/ FM1/ AM3+/ AM3/ AM2+/ AM2
