

Clearneon II Invisible UV Spray Paint - White

\$25.00

Product Images

Short Description

ClearNeon Orange New Formula! Our paint is now more invisible and brighter than ever! This color is beautiful in all applications, but especially in sunset scenes. Yellow can also be used as a warning color. This clear coat goes on smooth and is virtually undetectable in normal light. Applies to most surfaces and dries fast, leaving you with an eye-catching effect. Note: Some colors will appear different on different surfaces. Also, some colors appear differently when used independently.

ClearNeon contains Rare Earth chemicals that are expensive and difficult to produce. These rare earth chemicals have a property that they become excited and produces visible light when they are illuminated ultraviolet light. Different rare earth chemicals produce different colors of light when excited. This property is some times known as Luminescent, Fluorescent or Phosphorescent.
