### Tt LCS Certified

Tt LCS Certified is a Thermalright exclusive certification applied only to products that pass the design and hardware enthusiast standards. The Tt LCS certification is to ensure you will get the best performance from the best features and fitment.

### Smart Fan Controller

The ARGB controller allows users to switch LED modes, LED colors, and lighting speeds when using a motherboard without a 5V addressable RGB header. Users can switch between flow, ripple, pulse, blink, wave, full light, RGB spectrum, and off modes with various colors and LED speed options.

### 120mm ARGB Radiator Fan

High-static pressure fan design delivers impressive cooling performance.

### High Efficiency Radiator

Specially designed 120mm large surface radiator increases surface area delivering exceptional heat dissipation.

### High Performance Waterblock

The high performance copper base plate accelerates heat conductivity.

### Highly Reliable Pump

The high quality and reliable pump enables maximum water circulation, keeping the copper plate continuously cool. The low evaporation tube effectively decreases the loss of coolant, therefore no refill is required.

### Simple Setup

Featuring superb cooling performance, the TH120 ARGB Sync provides an easy installation and maintenance-free operation, requiring only the minimum amount of space in the chassis.
