Description

The Bykski AIO series brings the chill! The Bykski B-FRD3080FE-RBW integrated GPU cooler is a combination of pump, water block, radiator, and teflon lined tubing connected as an integrated unit to form a complete and effective internal self-circulating water cooling system. The system is dedicated to the cooling of the GPU only. The GPU block is a an electroplated copper base plate with outstanding thermal conductivity that includes addressable RGB built in. Matching 120mm A-RGB fans cool the radiator while lighting up your case.
