Short Description

Designed and manufactured in the USA by Performance PCs.
This is a single Loop Distribution Plate which fits onto the front panel of the Corsair 7000 X/D.

Description

Designed and manufactured in the USA by Performance PCs.

This is a single Loop Distribution Plate which fits onto the front panel of the Corsair 7000 X/D. It is compatible with any D5 or DDC pumps. It comes included with a D5 or DDC Retention Ring which attaches the pump to the Distribution plate. There are 10 ports, 4 inlets, 4 outlets and then a fill and Drain port on the back of the reservoir. It comes included with a DRGB Addressable LED strip.

NOTE: D5/DDC Pump and Cover Not Included.

Channelz Effectz Service

Tired of all that colored Coolant clogging up your loop but don't want to stick with some boring old clear coolant? Well Performance-PCs has you taken care of with their new Channelz Effectz Service! This service is a great way to add some color to your Channelz distribution plate without clogging your loop with pastel or mica filled coolants. We use an epoxy resin mixture that is safe for your loop and will certainly help that build POP. There is 30 different super vivid color options to choose from and we even added the ability for you to mix colors to give your loop its own style.

Features

Installation:

Compatible with the Corsair 7000 X/D. First install the stand-offs on to the back on the Distropate which is the side without the pump top. Remove side panel and the front glass panel, next take the front radiator mount and flip it around so that the concave part of the radiator mount is on the inside of the case. Now

with both panels removed and the radiator mount flipped insert the distroplate into the case lining the stand-offs up with the front radiator mounting points. Take the included M4x6mm Countersunk screws and mount the distroplate with the countersunk screws going through the radiator mounting holes.
