

WATERCOOL

# Watercool HEATKILLER CLEAR TUBING 16/10 (ID 3/8 " - 5/8" OD) 3M

\$15.99

## Product Images

## Short Description

The new HEATKILLER® Clear Tubing is the perfect choice for visually appealing and technically safe tubing of water cooling circuits. It was developed in cooperation with Mayhems Ltd. Developed to meet the highest demands of both industry and end users. The new HEATKILLER® Clear Tubing sets new standards in terms of transparency, bending radii and its special composition. For example, no polymer additives are used in the HEATKILLER® CLEAR Tubing.

## Description

---

The new HEATKILLER® Clear Tubing is the perfect choice for visually appealing and technically safe tubing of water cooling circuits. It was developed in cooperation with Mayhems Ltd. Developed to meet the highest demands of both industry and end users. The new HEATKILLER® Clear Tubing sets new standards in terms of transparency, bending radii and its special composition. For example, no polymer additives are used in the HEATKILLER® CLEAR Tubing.

Phthalates are completely avoided. The typical slagging and clogging caused by washed-out plasticizers is largely reduced thanks to this special formula. In long-term tests in the WATERCOOL laboratory, no difficulties arose even after a long period with different liquids. The HEATKILLER® CLEAR tubing lost neither its transparency nor its gloss. The cooling structures also remained clean and without any clogging.

## Specifications

---

Technical details:

Hose color: transparent / clear

Outside diameter: 16

Inside diameter: 10

Material: PVC

Max. Temperature: 60 ° C

Min. Temperature: -20 ° C

## Additional Information

---

Brand	Watercool
SKU	WC-50277
Weight	1.2000
Color	Clear
Tube Type	Norprene
Tube Size	10mm x 16mm
Delivery	Bare
Vendor SKU/EAN	4251312604547
