The new HEATKILLER® Multitop series for Lowara/Laing DDC pumps is characterized by its unique construction and expandability. The SINGLETOP is manufactured from a solid, 30mm thick acetal block and convinces with an outstanding quality of workmanship.

Description

The new HEATKILLER® Multitop series for Lowara/Laing DDC pumps is characterized by its unique construction and expandability. The SINGLETOP is manufactured from a solid, 30mm thick acetal block and

convinces with an outstanding quality of workmanship.

The internal channel structure has been optimized for delivery head and flow capacity

Our complex manufacturing process allows us to mill the positioning attachments from one block. This results in less vibration at the transition to the pump and therefore also contributes to quieter operation. It also greatly simplifies installation.

The SINGLETOP is intended to be used with a single DDC pump and cannot be expanded.

Specifications

Technical data:

Dimensions (LxWxH): 62 x 62 x 30mm (without connections, without pump)

Weight: 100g

Material: Acetal

Connectors: 2x G1/4 inch thread

Additional Information

Brand	Watercool
SKU	WC-31015
Weight	0.5000
Color	Black
Pump Type	DDC
Material	Acetal
Vendor SKU/EAN	4251312604943
