Short Description

HEATKILLER High Luminous aRGB LED Stripes provide a stylish illumination for your high-end hardware. 144 LEDs per linear metre ensure an immense luminance and powerful colour representation. While the strips also look extremely appealing with a black PCB and a width of only 6mm. With a cable around 40cm long,

Description

HEATKILLER High Luminous aRGB LED Stripes provide a stylish illumination for your high-end hardware. 144 LEDs per linear metre ensure an immense luminance and powerful colour representation. While the strips also look extremely appealing with a black PCB and a width of only 6mm. With a cable around 40cm long, the stripe can be connected directly to the mainboard using a 3-PIN aRGB connector. Thereby most common standards such as AURA from Asus, AORUS RGB Fusion, MSI Mystic Light etc. are supported. If desired, the stripe can also be operated on a separate RGB controller with support for addressable LEDs. By the way, the HEATKILLER High Luminous aRGB LED Stripes are also used to illuminate different HEATKILLER® products.

Specifications

The compatibility is defined as following:

Size XS

HEATKILLER® Tube 100
HEATKILLER® IV for GTX 1080 and 1070
HEATKILLER® IV for TITAN X and GTX 1080Ti

Size S

HEATKILLER® Tube 150
HEATKILLER® Tube 200

Size M

HEATKILLER® IV for Radeon RX 5700 / XT
HEATKILLER® IV for ASUS RTX 2080 Ti STRIX
HEATKILLER® IV for GTX 1080 and 1070 FTW/FTW2
HEATKILLER® IV for RTX 2080 and 2080 Ti Series
HEATKILLER® V for RTX 3080/3090 and 3080 Ti Series

Warning: this stripe can only be connected to an addressable RGB header. Using it on a regular RGB header can damage both the stripe and the header.

Specifications:

Voltage: 5V
Connector: 3-Pin (5VDG, 5V)
PCB Width: 6 mm
PCB length: 50mm
LED / Meter: 144

Additional Information
