Short Description

EK-Quantum Velocity Strike is a new variant of the EK-Quantum Velocity, a high-performance flagship premium quality CPU water block for modern Intel and AMD processors. It features a newly developed aesthetical top with a diagonal strike-through design mixing black nickel and black for an elegant and striking look. The design with a 45-degree line across the center of the block perfectly matches certain high-end motherboards that are on the market today.

Description

EK-Quantum Velocity Strike is a new variant of the EK-Quantum Velocity, a high-performance flagship premium quality CPU water block for modern Intel and AMD processors. It features a newly developed aesthetical top with a diagonal strike-through design mixing black nickel and black for an elegant and striking look. The design with a 45-degree line across the center of the block perfectly matches certain high-end motherboards that are on the market today.

EK Quantum Velocity series CPU water blocks embed the 5th generation of the award-winning EK CPU water block cooling engine, further tweaked for performance and optimal coolant flow! Low hydraulic flow restriction enables this product to be used in setups using weaker water pumps or lower pump speeds for added silent operation, while still achieving top performance!

The top is CNC machined out of a solid piece of brass which is nickel-plated black, while the aesthetic cover piece of aluminum anodized in matte black. The purest copper available on the market is used for the EK-Quantum Velocity Strike cold plate which is precisely machined to a dense micro-fin structure. The contact surface itself is machine polished for better contact with the CPU IHS.

The new cooling engine is characterized by the top-integrated jet nozzle which is combined with a thicker jet plate allowing a more precise bow control. The simplified water block structure offers a more optimized coolant flow and easier maintenance, while the interchangeable thick jet plate ensures the best contact surface for mainstream and HEDT Intel platforms.

The block is equipped with a reinforced hold-down bracket, and the enclosed mounting kit includes all the necessary mounting screws, mounting springs, an Intel 115x backplate, an AMD AM4 backplate, rubber backplate gasket and a small tube of Thermal Grizzly Hydronaut high-performance thermal paste. The EK-Quantum Velocity Strike CPU water block features a universal mounting mechanism that offers error-preventing, tool-less installation supporting Intel LGA-115x and LGA-20xx sockets out of the box. The mounting screws are streamlined and are even smaller than before for an added aesthetic perfection. The user has to replace the mounting bracket in order to mount the water block to AMD AM4 socket motherboards.

This product is compatible with all popular RGB sync technologies from all major motherboard manufacturers. The arrow marking on the 3-pin LED connector is to be aligned with the +5V marking on the RGB header.

Features

Enclosed:

- EK-Quantum Velocity Strike CPU water block
- PreciseMount universal CPU mounting mechanism
- EK-Quantum Velocity Backplate
- 2.5mm Allen key
- Jet J2 (0.8mm* thick)
- Thermal grease Thermal Grizzly Hydronaut (1g)

Specifications

Technical specifications:

- D-RGB cable length: 30cm
- D-RGB connector classic 3-pin (+5V, D, Blocked, G)

CPU socket compatibility:

- Intel LGA-1200

- Intel LGA-1150/1151/1155/1156
- Intel LGA-2011(-3)
- Intel LGA-2066
- AMD AM4

Additional Information

Brand	EK Waterblocks
SKU	EK-QUANT-VEL-STRIKE-DRGB-BKNK+BK-D
Weight	2.2000
Color	Black/Silver
CPU Series	Intel LGA 1150/1151/1155/1156/2011(-3)/2066 AMD AM4/Ryzen
Block CPU Type	Intel/AMD
Block Style	Nickel
Vendor SKU/EAN	3831109859506
Special Price	\$134.99
