Short Description

The new HEATKILLER® Multitop series for Lowara/Laing DDC pumps is characterized by its unique construction and expandability. The Multitop X2 is manufactured from a solid, 30mm thick acetal block and convinces with an outstanding quality of workmanship.

Description

The new HEATKILLER® Multitop series for Lowara/Laing DDC pumps is characterized by its unique construction and expandability. The Multitop X2 is manufactured from a solid, 30mm thick acetal block and

convinces with an outstanding quality of workmanship.

The internal channel structure has been optimized for delivery head and flow capacity.

Our complex manufacturing process allows us to mill the positioning attachments from one block. This results in less vibration at the transition to the pump and therefore also contributes to quieter operation. It also greatly simplifies installation. The Multitop X2 provides a serial connection of two DDC pumps and thereby increases the delivery head. An expansion with our EXPANSION TOPs is easily possible, theoretically allowing infinite scaling. The modular parts are held together by a solid M5 screw.

Specifications

Technical data:

Dimensions (LxWxH): 125 x 62 x 30mm (without connections, without pump)

Weight: 250g

Material: Acetal

Additional Information

Brand	Watercool
SKU	WC-31016
Weight	1.5000
Color	Black
Pump Type	DDC PWM
Vendor SKU/EAN	4251312604950
