Short Description

A custom designed Singularity Computers hub with high quality components and a dual layer PCB.

Description

A custom designed Singularity Computers hub with high quality components and a dual layer PCB. The PCB and connectors are black with white logos and labelling. It has an ARGB input which is split into 8 outputs in a row. This hub draws power from the ARGB inputs, so it does not require any extra power connections. It comes with an ARGB cable to connect the hub to your motherboard or other devices.
