Special Price  
**\$19.98** was  
**\$39.95**

## Product Images

## Short Description

AeroCool's new PowerPanel is the worlds first multifunctional panel with power USB. The PowerPanel includes two powered USB ports, one 5V and one 12V. The 5V can be used to power a USB hub, 2.5" HD-External Box, cell phone charger or an iPod charger. Way cool! The 12V can power an external optical drive, 3.5" HD-external box, LCD monitor or a scanner. No more having to use those annoying wall warts to recharge or run your electronic accessories. Power Panel also includes standard front USB and SATA ports, front audio ports and a 25-1 card reader. With the slick brushed aluminum panel this is one sweet looking front panel device!
