Short Description

Bitspower's mono block has been specially designed for the MSI MEG X570 GODLIKE motherboard, with a unique design which drives water flow to the southbridge chip.

Description

Bitspower Mono Block for MSI MEG X570 GODLIKE

Bitspower's mono block has been specially designed for the MSI MEG X570 GODLIKE motherboard, with a unique design which drives water flow to the southbridge chip. Firstly, the block cools the CPU with the coldest water, and then redirects the liquid through the VRM to keep all components cool and to ensure the absolute best performance.

The top layer is made of transparent acrylic, which not only has an efficient waterway design, but also retains the dynamic display of MSI MEG X570 GODLIKE motherboard, which is compatible with the original M.2 armor. The block's black sandblasted aluminum parts and unique design have been created to really accentuate the style of your computer. The bottom plate is made of high-quality red copper, and fits tightly with the CPU, VRM and southbridge chip after installation, providing your system with the most efficient heat conduction.

Additionally, the Bitspower AMD X570 series mono block is equipped with Bitspower digital RGB LED lighting. With its easy-to-control lighting effects, the X570 series mono block is sure to turn your build into a real attention grabber.

Features

LED Color : Digital RGB
LED Strip Management By Bitspower Digital RGB And Certified By ASUS AURA Sync, GIGABYTE RGB Fusion, MSI Mystic Light Sync, ASRock Polychrome and Razer Chroma

Specifications

Included :
1set of MBMX570GL
1set of Thermal PAD
1set of Mounting Screws/Accessories

Compatibility :
MSI MEG X570 GODLIKE

*** Bitspower reserves the right to change the product design and interpretations. These are subject to change without notice. Product colors and accessories are based on the actual product. ***
*** From 15th March 2018, all of our installation guides will be provided electronically via an easy-to-use QR code attached to the packaging. ***
*** Before filling in the water, please make sure all the components are installed correctly. To prevent any leakage which may damage the PC components, please perform a 24-hour leaking test with only the pump connected to the power supply. ***
*** When using the leak tester on a water cooling loop, in order to avoid product damage due to excessive pressure, the input pressure should not exceed 0.5kg/cm2 (bar), and do not over 30 second. The leak tester must not be used when there is water in the loop or when the pump is running. If the product is damaged due to excessive pressure or incorrect use, Bitspower's product warranty will be null and void, and the cost of any damage to the hardware will be borne by the customer. ***

Additional Information

Brand	Bitspower
SKU	BP-MBMX570GL
Weight	2.0000
Color	Clear
Chipset Motherboard	MSI MEG X570 GODLIKE
Block Style	Nickel-Plexi
Material	Copper
Vendor SKU/EAN	4712914785336
