## Short Description

Bitspower Digital Flow Meter Display

## Description

Bitspower Digital Flow Meter Display

The Bitspower Digital Flow Meter Display can be easily integrated into your water cooling system and allows for real time monitoring of your loop's flow—the perfect accessory for complex water cooling systems. Simply connect the flow meter to the coolant channel and use the SATA power supply. The sensor detects the water flow and immediately displays the water flow on the OLED panel. In addition to providing a visual representation of the flow level, the product also provides an audible alarm: if the flow rate of water is less than 0.5 liters per minute, a warning alarm will ring out, while a warning symbol will also appear on the OLED panel. With the Bitspower Digital Flow Meter Display, you can rest assured that you'll stop leaks dead in their tracks!

## Specifications

---

Thread : G1/4" Operate voltage : DC 4.5V~5.5V Flow : 0.5-30.0 LPM±5% Operate current : <200 mA

## Additional Information

---

Brand	Bitspower
SKU	BP-FMD
Weight	0.3000
Color	Black
Msc Watercool	Flow Indicator
Material	Acrylic, Brass
Vendor SKU/EAN	4712914786760
