Short Description

The patent pending "F" fittings are a convenient alternative to "Y" and "T" connectors. They are used to link two water-blocks in parallel using dissimilar tubing sizes.

Description

The patent pending "F" fittings are a convenient alternative to "Y" and "T" connectors. They are used to link two water-blocks in parallel using dissimilar tubing sizes.

The advantage of these barb fittings compared to Y's or T's are:

- Cleaner routing of the tubing
- Reduction from "large" tubing size such as 1/2" or 3/8" to devices installed in space constrained areas and necessarily requiring 1/4" ports

- Minimal pressure drop
- Three models are currently available:
1. 1/2"body to 1/4" branch
 2. 3/8" body to 1/4" branch
 3. 1/4" body to 1/4" branch

Specifications

Material: POM (Acetal Copolymer)

Additional Information

Brand	Swiftech
SKU	F500-250
Weight	0.1000
Fitting Type	Splitter
Fitting Size	1/4"
Fitting Angle	30 Degree
