Short Description

Ever wish you had another hand when working on precision projects? This clamping device truly provides "helping hands". It's heavy and stays put while you work on everything from jewelry to circuit boards. Check out this versatile Helping Hand Magnifier. Made with a rimless acrylic lens; designed for hobbyists and professionals such as welders, electricians, and technicians. Designed For Your Home or Workshop. This 2X helping hand magnifier is ideal for soldering, building models, electronic repair, DIY projects, jewelry, hobbies and crafts. While the 4X auxiliary spot lens adds extra zoom when you need to see more intricate details.

Description

Ever wish you had another hand when working on precision projects? This clamping device truly provides "helping hands". It's heavy and stays put while you work on everything from jewelry to circuit boards.

Versatile Helping Hand Magnifier

Made with a rimless acrylic lens; designed for hobbyists and professionals such as welders, electricians, and technicians.

Designed For Your Home or Workshop

This 2X helping hand magnifier is ideal for soldering, building models, electronic repair, DIY projects, jewelry, hobbies and crafts. While the 4X auxiliary spot lens adds extra zoom when you need to see more intricate details.

Fully Adjustable Workstation

There are two adjustable points on the neck of the unit, allowing the magnifying lens to be positioned at various angles and heights. Items are held securely by the clamp and 2 alligator clips on a 4 way swivel, and the section holding the clips can be adjusted in height as well. The lens can also be rotated 360 degrees.

Made To Last

Constructed out of scratch resistant acrylic lens, metal, and ABS, our multifunctional helping hand magnifier is both sturdy and durable.

Illuminate While You Magnify

Equipped with 2 super bright LED lights to provide an evenly lit viewing area even under low-light conditions. The lights run on 3 AAA batteries or a USB source such as a power bank or wall plugin.

Features
