

WATERCOOL

Watercool HEATKILLER V EBC - BACKPLATE FOR RTX 3080/3090 EVGA XC3 - BLACK

\$19.95

Product Images

Short Description

The HEATKILLER® V eBC backplate is a useful addition for the HEATKILLER® V VGA water blocks. Mounted on the backside of the graphics card, it improves the cooling performance while also granting mechanical stability. This is due to the construction out of massive black anodized aluminum. Even more, it also just looks good.

Description

The HEATKILLER® V eBC backplate is a useful addition for the HEATKILLER® V VGA water blocks. Mounted on the backside of the graphics card, it improves the cooling performance while also granting mechanical stability. This is due to the construction out of massive black anodized aluminum. Even more, it also just looks good.

The backplate cools relevant components on the PCB's backside, including GPU, RAM, and voltage regulation (VRM). Pre-cut thermal pads are included in the scope of delivery.

Isolating spacers on the backside of the backplate ensure easy installation.

The enclosed mounting material is optimized for usage with HEATKILLER® V water blocks. The backplate can be used with water blocks of other manufacturers. You might need to modify the mounting material, though. This is not part of the delivery scope

Specifications

Technical data:

Material: Anodized aluminum

Dimensions (L x W x H):

Weight: 150g

Compatible with:

EVGA Geforce RTX 3080/3090 XC3

Please consult the compatibility chart at <http://gpu.watercool.de>

Scope of delivery:

1x HEATKILLER® V eBC - Backplate for RTX 3080/3090 EVGA XC3 - Black

1x Mounting material

Additional Information

Brand	Watercool
SKU	WC-16075
Weight	1.5000
Color	Black
Vga	EVGA® XC3 RTX 3080 and 3090
Block GPU Type	Nvidia
Block Style	Nickel-Plexi
Vendor SKU/EAN	4251312604820
Special Price	\$32.79
