

Channelz™ 360 RAD Distribution Plate

\$235.95

Product Images

Short Description

Channelz™ Designed and manufactured in the USA by Performance PCs.

The 360 RAD (Radiator and Distro) is part of PPCs Channelz line of distribution plates. It features direct radiator mounting to any of Hardware Labs 360mm Black Ice Radiators. Combining your radiator, fans, pump, and distro all into one convenient package makes this manifold one of the most efficient ways to watercool your rig!

Please Note: 25mm thick fans (Not included) and 2x 22-31mm Male G1/4" Adjustable Extensions (Not included) are required to use this distro on your HWL radiator.

Description

Designed and manufactured in the USA by Performance PCs.

The 360 RAD (Radiator and Distro) is part of PPCs Channelz line of distribution plates. It features direct radiator mounting to any of Hardware Labs 360mm Black Ice Radiators. Combining your radiator, fans, pump, and distro all into one convenient package makes this manifold one of the most efficient ways to watercool your rig! The 360 RAD has been designed to allow a D5 or DDC pump to be bolted directly to the distro so you can be sure all of your components are getting the best flow possible, and if you're ever concerned they're not, you can always check the one of a kind flow indicator built right into the manifold. Between the space saving features and the effective placement of ports, this distro is sure to make your watercooled PC better than it ever could have been!

Please Note: 25mm thick fans (Not included) and 2x 22-31mm Male G1/4" Adjustable Extensions (Not included) are required to use this distro on your HWL radiator.

Channelz Effectz Service

Tired of all that colored Coolant clogging up your loop but don't want to stick with some boring old clear coolant? Well Performance-PCs has you taken care of with their new Channelz Effectz Service! This service is a great way to add some color to your Channelz distribution plate without clogging your loop with pastel or mica filled coolants. We use an epoxy resin mixture that is safe for your loop and will certainly help that build POP. There is 30 different super vivid color options to choose from and we even added the ability for you to mix colors to give your loop its own style.

Features

Installation:

First separate the 2 ends of the adjustable extensions fittings and install one end to the the 360 Hardware labs radiator and the other end onto the Distribution plate. Next place your fans on the Radiator lining them up to the mounting holes, now place the distro plate onto of the fans make sure that the adjustable extension fittings line up to the adjustable extensions that are attached to the distro plate. Now with the included M4x45mm screws mount the distro going through the fans to radiator.
