

# PPCS ModCube - DIY Case Hardware Aluminum Cube

\$2.29 As low as  
\$1.99

## Product Images

## Short Description

The PPCS ModCube is a simple little product that can actually make some very complex projects! These 12mm solid aluminum cubes are CNC milled to perfection and are surrounded on all 6 sides by M3 screw holes. What are ModCubes you ask? Well they are the essential component to constructing your own scratch build chassis. Using these cubes and sheets of acrylic in any thickness, you can screw together panels to the cubes and create elaborate PC casings. Think of these little gems as a big boys erector set! Honestly, there is unlimited uses for these tiny cubes and when you design your scratch build properly, you cannot imagine

how stiff and solid all this holds together.

These cubes are sold by the piece One (1) Cube along with the option to add as many M3 screws as you find necessary to put together that dream case project. We offer M3 screws with hex heads in 3 of the most common lengths of screws used with 12mm ModCubes which are 8mm, 10mm and 12mm. You will want to match your screws to your acrylic material thickness using 8mm screws for 1/8" (3mm), 3/16" (4mm) and 1/4" (6mm) as a suggestion.

So sketch up that new Scratch Build idea of your and plan out how many PPCS ModCubes will make your dream a reality!
