

EK-Quantum Torque Extender Static MF 7 - Gold

\$7.99

Product Images

Short Description

EK-Quantum Torque Extender Static MF 7 is a premium male+female threaded extender. It is commonly used to extend a G1/4" port from a block, radiator, or any other liquid-cooling component in order to ease the process of connecting to other components and having fewer bends or inaccessible fittings at tight places.

Description

EK-Quantum Torque Extender Static MF 7 is a premium male+female threaded extender. It is commonly used to extend a G1/4" port from a block, radiator, or any other liquid-cooling component in order to ease the

process of connecting to other components and having fewer bends or inaccessible fittings at tight places.

This is not a revolvable extender.

Made from CNC machined brass with satin silver finish. Sealed with quality EPDM O-rings.

EK-Quantum Torque series products received the prestigious iF Design Award. A robust and industrial aesthetic sets the Torque family apart by highlighting the precise manufacturing processes used to create them. In addition, enthusiasts can add a unique color ring to give a personal accent to the fitting line. The Torque family of fittings offers a secure and modular system of connections between liquid cooling components and tubing within a PC. Quantum Torque series products cover angled adapters, rotary and static extenders, splitters, G1/4" plugs, drain valves, fittings, and much more.

These static extenders can be either tightened by hand or by using EK-Loop Multi Allen Key / Allen Key 9mm (not included, available for separate purchase).

Specifications

Technical data:

Threading: 2 x G1/4" (Male - Female)

Thread length: 4.5mm

Material: Brass

Diameter: 23mm

Height: 7mm

Made in Europe

PLEASE NOTE:

- Do not use excessive force when attaching fitting barbs using Allen Key 9mm in order to prevent damage!
- This product should NOT be installed with any aluminum Fluid Gaming parts!
- Satin Titanium Quantum Torque series extenders are intentionally not painted on the inside to reduce the level of possible pollutants in the loop.
