

HEATKILLER IV PRO (INTEL LGA 1X00) ACRYL

\$89.95

Product Images

Short Description

Top quality high-end CPU water block with a nickelplated coldplate and a decorated top made from acryl (PLEXIGLAS® GS). Compatible with INTEL Sockets 1150, 1151, 1155, 1156 und 1200.

Description

Our HEATKILLER® series CPU water blocks are some of the best performing and most popular CPU blocks on

the market. Since its introduction in 2001, we continuously enhanced and improved the series. The HEATKILLER® IV is the most comprehensive and recent iteration of the franchise.

New cooling engine and optimized flow paths

Through all developments, the cooling engine took the biggest evolutionary step. We gave the cold plate significantly thinner fins, which results in a larger surface and better heat dissipation. At the same time, we made sure that the flow rate isn't impacted by this.

We dropped the separate jet plate design, but integrated its mechanics directly into the top. This new technology improves performance, flow rate, and reliability.

Heatkiller IV Easy-Mount, premium manufacturing, Made in Germany

We developed the revolutionary Easy-Mount -System to simplify the installation process. After the first installation, the block can be installed and uninstalled completely tool-less. The system also provides a fixed stop of the installation bolts. A faulty installation is almost impossible with this system.

But the design should also be worthy of a WATERCOOL product. Only the highest quality raw materials combined with the most cutting edge manufacturing technologies make a true HEATKILLER IV. As a final touch on the design, we took care of our customers' requests and made the block compatible with fittings of up to 19mm width.

All HEATKILLER components are manufactured on our own CNC machines at the WATERCOOL headquarters in Waren, Germany. Many steps of the process are manual labor and each product is finished under dual control principle. This is truly "Made in Germany".

Features

- Up to 3°C better cooling performance compared to its predecessor
- Better flow rate thanks to bigger jet plate nozzle and channel layout less clogging
- Tool-less Easy-Mount-System
- Compatible with extra large fittings thanks to 25mm port distance

Specifications

Specifications:

Material: PLEXIGLAS® GS (top), nickel-plated copper (bottom plate), polished stainless steel (brackets, inlay), nickel-plated brass (Easy-Mount-System)

Dimensions (L x W x H): 66 x 59 x 17 mm

Weight: ca. 450 g

Sealing: NBR 70

Threads: 2x G ¼ inch (DIN ISO 228-1)

Thread distance: 25 mm

Socket compatibility INTEL: 1150, 1200 and 1700

Included:

HEATKILLER® IV PRO (INTEL processor) ACRYL

Chip Manufacturer:	INTEL
for CPU Socket:	1150, 1151, 1155, 1156; 1200 & 1366 1700
Block Material:	nickel plated copper
Top Material:	ACRYL
Shipping weight:	0,35 Kg
Product weight:	0,35 Kg

Additional Information

Brand	Watercool
SKU	WC-18074
Weight	1.2500
CPU Series	Intel 1150, 1151, 1155, 1156/ 1200 & 1366/ 1700
Block CPU Type	Intel
Vendor SKU/EAN	4251312605544
