Help protect your equipment and reduce scratches

## Short Description

Ever wish you had another hand when working on precision projects? This clamping device truly provides that. Check out this flexible arm welding repair tool. Designed For Your Home or Workshop.

## Description

Ever wish you had another hand when working on precision projects? This clamping device truly provides that. Check out this flexible arm welding repair tool. Designed For Your Home or Workshop. This 3X magnifier

is ideal for soldering, building models, electronic repair, DIY projects, jewelry, hobbies and crafts.

## Features

---

- The clip bracket that can rotate 360 degrees supports the display of the circuit board at any angle, so that the welding and maintenance can be carried out in all directions without dead ends, which greatly improves the work efficiency.
- The sturdy metal frosted chassis is stably placed on the workbench, with six magnetic clips to securely fix the circuit board, and it can also be used as a repair board with other tools.
- Two 310mm and 150mm magnetic flexible arms are firmly attached to the iron plate, and equipped with a 360-degree rotating alligator clip, so that the circuit board can be adjusted after being fixed, helping to reduce unnecessary trouble.
- Suitable for welding repair/DIY/electronic product maintenance/handicraft production/painting/statue, etc.

## Specifications

---
