Short Description

The CORSAIR iCUE COMMANDER CORE XT is both a PWM fan controller and RGB controller in one, turning your PC's case into a smart case. Use CORSAIR iCUE software for precise fan speed control and intelligent fan detection, along with RGB lighting control for multiple components.

Description

Connect. Control. Command: The CORSAIR iCUE COMMANDER CORE XT turns your case into a smart case, using CORSAIR iCUE software to conveniently control up to six case fans and lighting for multiple RGB components.

Precise PWM Fan Speeds: Powers and controls up to six PWM fans, including Zero RPM mode to keep the noise down at low loads.

System-Wide RGB Lighting Customization: Control up to 264 RGB LEDs out of the box - directly connect up to six CORSAIR RGB fans*, as well as an additional lighting channel to control other CORSAIR RGB devices such as Hydro X Series lighting, RGB LED Lighting PRO Expansion Kit light strips, or an RGB Fan LED Hub with up to six additional RGB fans.

*Not compatible with CORSAIR SP RGB Series fans.

Intelligent Fan Detection: The COMMANDER CORE XT automatically detects any combination of up to six individually addressable CORSAIR RGB fans, such as the high-performance ML PRO RGB and the ultra-vibrant QL RGB, making them easier than ever to set up.

Accurate Temperature Monitoring: Two included repositionable temperature sensors allow you to accurately monitor temperatures throughout your system with CORSAIR iCUE software.

USB 2.0 Pass-Through Port: Connect an additional internal USB device, such as a CORSAIR AXi Series PSU or PRO XT cooler.

Automated Control: Set up custom fan curves and lighting profiles to automatically adjust fan speeds and RGB lighting based on system temperatures.

Your Setup at Your Command: Powerful CORSAIR iCUE software offers a single interface to customize RGB lighting, monitor CPU and coolant temperatures, adjust fan speeds, and set up fan curves.

Easy Installation: Embedded magnets and a low-profile design make it simple to install the COMMANDER CORE XT on any flat surface inside your case.

Features

- Precise PWM Fan Speeds
- Intelligent Fan Detection
- Accurate Temperature Monitoring
- USB 2.0 Pass-Through Port
- Automated Control
- Your Setup at Your Command
- Easy Installation

Specifications

Brand	Corsair
Model	CL-9011112-WW

Details

Types	Fan Speed and RGB Lighting Controller
Colors	Black
Specifications	Input voltage - Fan: 12V Input voltage - RGB: 5V Max Current - Fan: 4.5A Max Current - RGB: 4.5A Headers: 6x 4-pin PWM fan headers 6x 4-pin CORSAIR RGB headers 1x 3-pin CORSAIR RGB header 2x Thermistor ports Connection cable: USB 2.0 with 1x USB 2.0 pass-through (top row; 5-pin) Package contents: 1 x COMMANDER CORE XT 2 x Thermistor cables Documentation

Additional Information

Brand	Corsair
SKU	CL-9011112-WW
Weight	0.2300
Color	Black
Light Accy Type	Controller Hub
LED Color	RGB
Vendor SKU/EAN	840006629788
