

XSPC AX560 Quad Fan Radiator (White)

\$116.95

Product Images

Short Description

The AX is a premium radiator from XSPC. The AX series combines a high performance copper/brass radiator core with a compact and beautifully finished aluminium enclosure.

Description

The AX is a premium radiator from XSPC. The AX series combines a high performance copper/brass radiator

The AX's core is a high performance evolution of the popular EX radiator series. The core includes advances from the EX series like welded seam tubes and splitter fins, but with a thicker core (21mm vs 16mm) and increased surface area.

The radiator core is fitted inside of a 3mm thick, extruded and machined aluminium shell. The screw holes are precision cut by CNC which eliminates misaligned screw holes and gives 3mm of screw thread. The aluminium shell also provides a perfectly flat surface to mount the fans against, which eliminates air gaps and any need for a gasket.

Additional Information

Brand	XSPC
SKU	XSPC-AX560-WT
Weight	5.0000
Color	White
Radiator Size	560 (4 x 140mm)
Radiator Thickness	40mm
Internet Reviews	<p>It costs slightly less than average compared to the radiators it is being compared against, and this is in its favor along with the good build quality, aesthetics/color options and the ability to mod the core/frame easily. It outperforms the other XSPC 140 rad series- the EX- easily at all fan speeds/airflow levels tested and is very similar in liquid and air flow restriction. As such, this is indeed the XSPC flagship for 140/280/420/560 mm radiator options.</p>
