It has 17 G1/4-inch connections and is intended for installation in the front of the Lian Li 011D XL. It enables the connection of the graphics card and CPU. Due to this distroplate up to three 360mm radiators can be installed.

## Features

---

Features at a glance

- Largest distroplate in the Lian Li range
- Unique plug-in system for easy mounting in the case
- Adapter allows perfect fit of a DDC pump

The "Lian Li XL Distroplate Crosscool" replaces the tempered glass panel in the front thanks to the unique plug-in system. Two small hidden screws securely fasten the distroplate to the case. This makes installation easy for everyone. The manufacturer has also come up with an elegant solution for the DDC pump; namely a specially developed adapter that ensures that the pump fits perfectly and accurately on the Distroplate. This results in a tidy housing. Thanks to the RGB lighting of the case, the Crosscool itself is displayed in a perfect light and is therefore a real eye-catcher, not only because of its unique design.

## Specifications

---

Scope of delivery

- Lian Li XL Distroplate Crosscool
- 2x M3 screws
- Adapter DDC (without screws)

Technical Data

- Material: high quality acrylic glass, plastic
- Manufacturing: CNC-machining of the acrylic, assembly by hand
