\$19.95

## Product Images

## Short Description

Made of high-quality and advanced metal material, durable, firm and stable for us to use. This bracket can help you to make the graphics stand in a standing position, in a better looking form in the chassis.

## Description

---

Made of high-quality and advanced metal material, durable, firm and stable for us to use.

This bracket can help you to make the graphics stand in a standing position, in a better looking form in the chassis.

Anodic oxidation process, good and excellent one to replace the old, broken or damaged ones.

The bracket has certain requirements for the chassis. This bracket requires that the graphics card slot of the chassis is hollow, so if the metal of the chassis graphics slot is not hollow, you need to DIY some cutting to put it into the bracket.

Anodic oxidation process, easy and convenient for us to install and disassemble.
