Featuring 7 Ports total, designed to be used with 1 or 2 radiators and integrated D-RGB for stunning lighting effects. This distro plate is also compatible with standard D5 or DDC pumps. 70mm of clearance between pump top and Radiator mounting

Channelz Effectz Service

Tired of all that colored Coolant clogging up your loop but don't want to stick with some boring old clear coolant? Well Performance-PCs has you taken care of with their new Channelz Effectz Service! This service is a great way to add some color to your Channelz distribution plate without clogging your loop with pastel or mica filled coolants. We use an epoxy resin mixture that is safe for your loop and will certainly help that build POP. There is 30 different super vivid color options to choose from and we even added the ability for you to mix colors to give your loop its own style.

Features

Installation:

First Remove the front Glass of the Hyte Y60 once this is done remove the 2 brackets that the front glass rest on. Next attach the 3 L-brackets included in your box onto the back of the distro(do not tighten these all the way yet). Once the L- Brackets are installed you can place the distro into the front glass spot and use the

original screws that held the glass in place to hold the distro in place. Once this is done you can tighten up the screws hold the L brackets on distro.
