Short Description

RAIJINTEK Copper radiator - 27mm thickness, CALORE ELITE CA240, is made of copper with high-density copper fin design and brass tank. CALORE radiator is engineered with 12-set flat tube design and brass tank. Fin design is optimized for efficiently pulling heat away from the power-dissipating components thus achieving maximum heat dissipation at high airflow operation.

Description

RAIJINTEK Copper radiator - 27mm thickness, CALORE ELITE CA240, is made of copper with high-density copper fin design and brass tank. CALORE radiator is engineered with 12-set flat tube design and brass tank. Fin design is optimized for efficiently pulling heat away from the power-dissipating components thus achieving maximum heat dissipation at high airflow operation. CALORE ELITE CA240 radiator is made of premium-quality materials that provide exceptional performance, unrivalled reliability. The unique stainless steel side panels guarantee the durability as well as reduce the weight of the radiator. Integrated G1/4" threads make it easy to install, while rigid connections ensure leak-resistant measures are in place. Square Fan anti-vibration rubber is provided to eliminate most vibration from fan.

Features

- Copper radiator - 27mm thickness
- 12-set wide flat copper tube design
- FPI:17, High-density copper fins

- Copper chamber and housing
- High-Quality Manufacturing Process, Reflow soldering, to attain better heat evacuation
- Integrated with G1/4" threads make it easy to install
- Square Fan anti-vibration rubber provided to eliminate most vibration from fan

Contents:

- CALORE ELITE C240D × 1
- Anti-vibration Rubber × 2
- M3 Screw × 8
- M3 Screw × 8
- Allen Key × 1
