Description

RAIJINTEK

RJK 5V DRGB-PWM CONTROL HUB

Introduction

RJK's 5V DRGB-PWM CONTROL HUB – Control all of your Addressable RGB Devices. 25 pre-set color modes and 7 different static color options also made for those without an Addressable RGB Header on their motherboard. Take full control of your system's light effects. 2 control modes, adjust directly via your controller (Control HUB Mode), or bridge it through your motherboard's ARGB HEADER and use your MB Software. Change the control mode by just a single switch; use your ARGB 5V ADD FANS without an ARGB capable motherboard. The Hub comes with 8 ports 5V ADD for your fans light effects and a total of 8 ports of PWM for your fans speed. A 600 mm 5V ADD M/B connecting cable is in the scope of delivery as well. Connect your Hub to the M/B through your 5V ADD header (Control your 5V ADD RGB light effects synchronously by your M/B 5V ADD Header). RAIJINTEK's RJK 5V DRBW-PWM CONTROL HUB is the easiest way and best solution for your light effects on your PC lighting system.
