Short Description

The EK-FC Pro Terminal Angled 45° - Extended is a replacement GPU water block terminal.

Description

Details

The EK-FC Pro Terminal Angled 45° - Extended is a replacement GPU water block terminal. It is compatible

with the server rack line of EK-Pro GPU water blocks and features two G1/4" threaded ports with a 45° angle for added compatibility in tight server enclosures.

The EK-FC Pro Terminal Angled 45° - Extended is CNC-machined out of a solid piece of high-grade POM material, with durable EPDM rubber seals and stainless-steel backplate.

Specifications

Enclosed:

- EK-FC Pro Terminal Angled 45° - Extended
- Allen Key 2.5mm
- Spare Gaskets (OR 15x1) x2
- Mounting Screws

PLEASE NOTE:

- Applying excessive force when re-tightening the screws can strip the threads and render the water block useless.
- We highly recommend you use the [EK-Loop Torque Screwdriver - 0.6 Nm](#).
