Description

Details

The EK-Pro CPU WB 4189 Rack Ni + Acetal is a dedicated enterprise-grade water block with 1U chassis compatibility which was specifically developed for LGA 4189 Intel® processors. The core of the new CPU water block was refined to manage the growing heat dissipation of new processors and to upgrade connectivity options for server rack requirements. The new server/workstation-grade CPU block is 1U chassis type compatible for use with server racks.

Features

The EK-Pro CPU WB 4189 Rack Ni + Acetal water block features a total of 4 G1/8" threaded side ports for low profile usage.

This enterprise cooling solution is built for performance, reliability, serviceability, and no compromises in mind. The EK-Pro CPU WB 4189 Rack Ni + Acetal water block meets these demands with top thermal performance, and unparalleled connectivity making it the perfect choice for liquid cooling high-density computing systems.

The EK-Pro CPU WB 4189 Rack Ni + Acetal water block features a precisely machined copper base ('cold plate') which is made from the purest copper available on the market and is treated with nickel electroplating. The top is CNC machined from durable black POM Acetal and the hold-down bracket is made of laser-cut stainless steel.
