

Description

Bitpower Leviathan II 140 Radiator with Single Wave Fins (Thickness 40mm)

A key component of water cooling loops, the Bitpower Leviathan II 140 Radiator can be equipped with fans (fans are sold separately), which is helpful for effective heat dissipation.

Features

The radiator is made of copper which has high thermal conductivity. Concise wave-shaped heat dissipation fins, greatly increase the heat dissipation area. Used with fans, it will effectively dissipate heat from the water cooling loop, and reduce the water temperature.
