

# EK-Loop Metal Tube Cutting Tool

\$19.99

## Product Images

## Short Description

EK-Loop Metal Tube Cutting Tool is a small handy tool specifically made for metal tube cutting.

## Description

## Details

EK-Loop Metal Tube Cutting Tool is a small handy tool specifically made for metal tube cutting. It is

compatible with various metal tubing made of copper, brass, and nickel. The maximum size compatibility of the cutter is 32mm of outer diameter (OD).

## Features

---

It enables you to shorten rigid metal tubing for your custom loop. It's made of stainless steel and can be adjusted to any tube size commonly used in hard-tube water-cooled PCs. It is perfect to couple with EK-Loop Metal Tubes to cut them to exact fitment onto the fitting and superior aesthetics.

## Specifications
