## Channelz Effectz Service

Tired of all that colored Coolant clogging up your loop but don't want to stick with some boring old clear coolant? Well Performance-PCs has you taken care of with their new Channelz Effectz Service! This service is a great way to add some color to your Channelz distribution plate without clogging your loop with pastel or mica filled coolants. We use an epoxy resin mixture that is safe for your loop and will certainly help that build POP. There is 30 different super vivid color options to choose from and we even added the ability for you to mix colors to give your loop its own style.

## Features

---

Installation:

This Distro is designed to replace the right side glass but can be used on the left as well. Simply remove the Silver thumb screws that hold the glass in place and replace the glass with the distro using the same Thumb screws.
