Description

Details

EK-Quantum Velocity² - AM5 Backplate is a backplate for EK-Quantum Velocity² AM4 water blocks that allows them to be mounted on the new motherboards based on the AMD LGA AM5 socket. This is the only product required to convert your EK-Quantum Velocity² AM4 CPU water block to an AM5 compatible cooler in order to cool your Ryzen 7000-series CPU.

Compatible with:

- EK-Quantum Velocity² AM4 water blocks

Specifications

Enclosed:

- Metal backplate for AM5 socket-based motherboards
- Torx key

Made in Slovenia - EU!

PLEASE NOTE:

- This backplate is exclusively for Velocity² AM4 water blocks to convert them to AM5-compatible cooling solutions
