Short Description

RAIJINTEK AGERAS series, 12025 PWM fan, continues company's innovative design and providing advanced features & additional value to end users. The AGERAS series combines an optimized five fan blade design to

provide high-volume airflow with less noise and turbulences, a Hydraulic Bearing with Low-Noise Design and Anti-Vibration rubber pads on all corners. It comes standard with LED's incorporated with fan blades, AGERAS series is not only managing your case to be the center of attraction and being a spotlight, but its optimized fan blade and housing design also provides outstanding air flow and cooling performance for your PC's motherboard and CPU.

Features

PERFORMANCE

- 2200RPM Max
- 67.38CFM
- 2.57mm-H2O

special design of fan blade to make high air pressure

AGERAS 12 ARGB-1 SINGLE FAN

- 5V ADD LED brings visible color & brightness uniformity from all direction
- Anti-vibration rubber pads on all corners to minimize movement and noise
- Spiral five fan blade design to provide high-volume air flow
- Specific housing design to provide max. static pressure
- PWM function to provide best efficiency for CPU cooling
- Individually controlled ADD LED lighting
- Quiet performance, less turbulences and reliable operation
- Easy installation

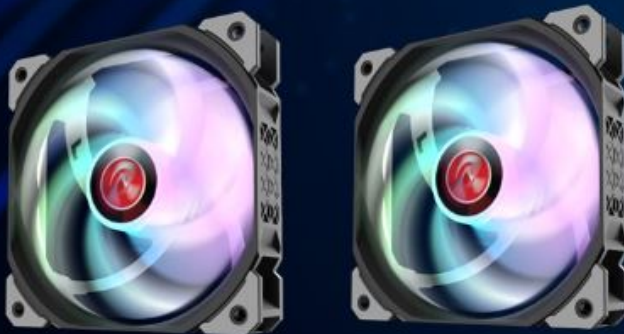

5V ADD Header Compatible

PWM 4 pin Header

AGERAS 12 ARGB-2 DUAL PACK

1 to 2 ARGB Y cable

1 to 2 PWM Y cable

- 5V ADD LED brings visible color & brightness uniformity from all direction
- Anti-vibration rubber pads on all corners to minimize movement and noise
- Spiral five fan blade design to provide high-volume air flow
- Specific housing design to provide max. static pressure
- PWM function to provide best efficiency for CPU cooling
- Individually controlled ADD LED lighting
- Quiet performance, less turbulences and reliable operation
- Easy installation

AGERAS 12 ARGB-3 TRIPPLE PACK

- 5V ADD LED brings visible color & brightness uniformity from all direction
- Anti-vibration rubber pads on all corners to minimize movement and noise
- Spiral five fan blade design to provide high-volume air flow
- Specific housing design to provide max. static pressure
- PWM function to provide best efficiency for CPU cooling
