Short Description

EK-Quantum Torque Drain Valve - Gold is a premium fitting acting as a perfect draining point in your system.

Description

Details

EK-Quantum Torque Drain Valve - Gold is a premium fitting acting as a perfect draining point in your system.

It features a secure cap, in form of a Torque fitting compression ring, and it can even fit an [aesthetic color ring for HDC 16 Torque fittings](#). The secure cap does not allow you to accidentally open or leave open the drain valve.

Features

This drain valve has an advantage over traditional ball valves in terms of size. It has a smaller footprint, secure locking, and an easy open/close mechanism that works on a slide. It has a male thread on one end, allowing you to screw it directly into a G1/4" female port on any water-cooling component without the use of an adapter fitting as traditional ball valves do.

Made of nickel-plated CNC machined brass, which is then treated with gold plating.

EK-Quantum Torque series products received the prestigious iF Design Award. A robust and industrial aesthetic sets the Torque family apart by highlighting the precise manufacturing processes used to create them. In addition, enthusiasts can add a unique color ring to give a personal accent to the fitting line. The Torque family of fittings offers a secure and modular system of connections between liquid cooling components and tubing within a PC. Quantum Torque series products cover angled adapters, rotary and

static extenders, splitters, G1/4" plugs, drain valves, fittings, and much more.

Specifications

Technical specifications:

- Threading: G1/4"
- Thread length: 4.5mm
- Diameter: 23mm
- Installed height: 29mm

ROHS compliant!

PLEASE NOTE:

- This product should NOT be installed with any aluminum [Fluid Gaming](#) parts!
