

WATERCOOL

HEATKILLER LGA 1700 HEAVY BACKPLATE

\$31.50

Product Images

Short Description

Massive backplate for use with the HEATKILLER® IV and thanks to M4 thread also other coolers. Suitable for the INTEL Alder-Lake 1700 socket.

Description

Massive HEAVY backplate for the current Intel Alder Lake LGA 1700 socket generation, CNC milled from 7mm thick aluminum. The HEAVY backplate prevents socket bending and therefore provides a more consistent contact pressure for maximum cooling performance. The included 0.8mm washer mod further optimizes the

experience.

Features

The insulated aluminium backplate can be easily mounted directly to the socket using integrated UNC threads. Additionally the case should have a recess in the tray in the area of the socket due to the thickness of the backplate. By the way, the backplate can also be used with coolers from other manufacturers. The M4 female threads provide an excellent compatibility.

Specifications

Technical data:
Dimensions (length x width x height): 87 x 87 x 7mm
Material : Aluminum
Compatible : Socket 1700 Alder Lake,
Weight : 110gr

Scope of delivery:
HEATKILLER® LGA 1700 HEAVY
Mounting material for HEATKILLER IV
0,8mm washer mod
